

Fungus Foray 16th October 2022

The Fungus Foray this year was held in Aversley Wood, following the closure of Waresley Wood. It was well attended with about 20 people and led by Alan Robbins.

Although not promising to begin with the afternoon turned out to be very interesting with about 55 species being found, several of them quite rare or unusual. Nice numbers of Magpie Inkcap were found in different stages. It was also nice to find Blue Roundhead, Willow Shield and Yellow Fieldcap. The photos are by Phil Bromley
